- Other (Write In):
Expand Wolf road East side near Joliet Road -

If the road has to be expanded by regulations, preference is a 2-way left turn lane.

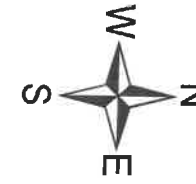

NO side walk on East side,

*Don't touch West side - leave single family homes alone.
* If there has to be a sidewalk - East side only!*

My pin #'s for Cook Count Real Estate ARE ^{are}

Both of these properties were not properly dedicated as the Deeds go to the middle of Wolf Road. I pay taxes to the middle of Wolf Road on these two pins. This has been wrong for 44 years that I have been here plus previous owners.

Other Address'ers on this section of Wolf Road have the same problem.

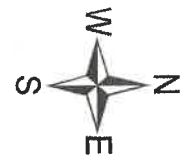

At corner of Wolf Rd ~~and~~ ^{Segusia Lane.}

The County says they have 33 feet from the middle of Wolf. ~~These~~ houses now are maintain the ditch since inception!

If you are expanding you will need to buy the property under eminent domain I believe. Please advise us in writing on what the plan is.

Our country is 34 Trillion dollars in debt! We will have to borrow money to pay the interest payment. We are passing this debt to the next generation. That is a crime. Our kids will be burdened with this and never forgive us! The road probably needs to be fixed but we don't have to have a bike path that the bike pack riders won't use. We need to wave the flag by not spending on things we don't need and scale this project back to minimum needs. Just because we are getting Federal funds for this project does not mean we are all not having to pay for it!

Please see other side

Wolf Rd. Corridor

When looking at this project as a whole, there are two different issues at hand. The first and foremost being that the road needs to be rebuilt. The secondary issue is the pedestrian traffic and construction of sidewalks or paths.

I would suggest and ask that a pedestrian study of not just Wolf Rd. But the adjacent areas be done before making any final decisions on sidewalks or paths. This is a suburban area with little to no foot traffic whatsoever. Just recently, a brand new sidewalk was built along 59th St. for students to safely travel to school. It has not created a change in what people do. The sidewalk is fairly empty, and the cars are lined up in every direction dropping off and picking up students in both good weather and bad. In suburban Cook County, very few people travel by foot or by bicycle. The cars are doing all of the transporting.

It seems there were a lot of resources that went into studying the traffic patterns along Wolf Rd. Instead of asking what people would like, I feel it would make sense to observe the pedestrian traffic in and around the Wolf Rd. Corridor.

In reviewing the three sections of the map, we have pedestrian pathways currently on predominately the East side of Wolf Rd. The only place it is not safe to have a pedestrian pathway on the East side would be between 72nd St. and Joliet Rd. Due to the dangerous crossings where the ramps are for the interstate. This is also an area which doesn't draw much pedestrian traffic at all, it is mostly commercial.

As far as the section of Wolf Rd. Between Joliet and Plainfield Rd., this is the section of the road which will be most impacted by the changes. Our valuable tree canopy is in danger with the current plan. This protects our residents from air and noise pollution, and some of our trees in this section are over 100 years old. This section of the road is 100% residential, and adding a third lane would unfortunately speed up the traffic that is already traveling in excess of the posted speed limit. I would ask that this section be two lanes with curb and gutter and NO TURN LANES. In the traffic data provided for the study, auto accidents were at the intersections of Joliet and Wolf and Plainfield and Wolf. Accidents were not occurring on Wolf Rd. Traveling North and South between these two points.

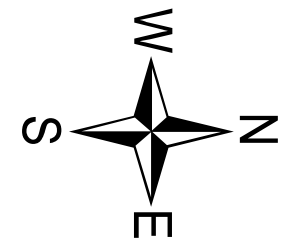

A two lane road with curb and gutter and a sidewalk on one side of the street would serve our community well and protect not only our natural resources, but our residents who are stakeholders on Wolf Rd. We have a very unique setting here, please help us protect it.

There are many options to make this Wolf Rd. Corridor between Plainfield and Joliet Rd more pedestrian accessible. Two options are as follows:

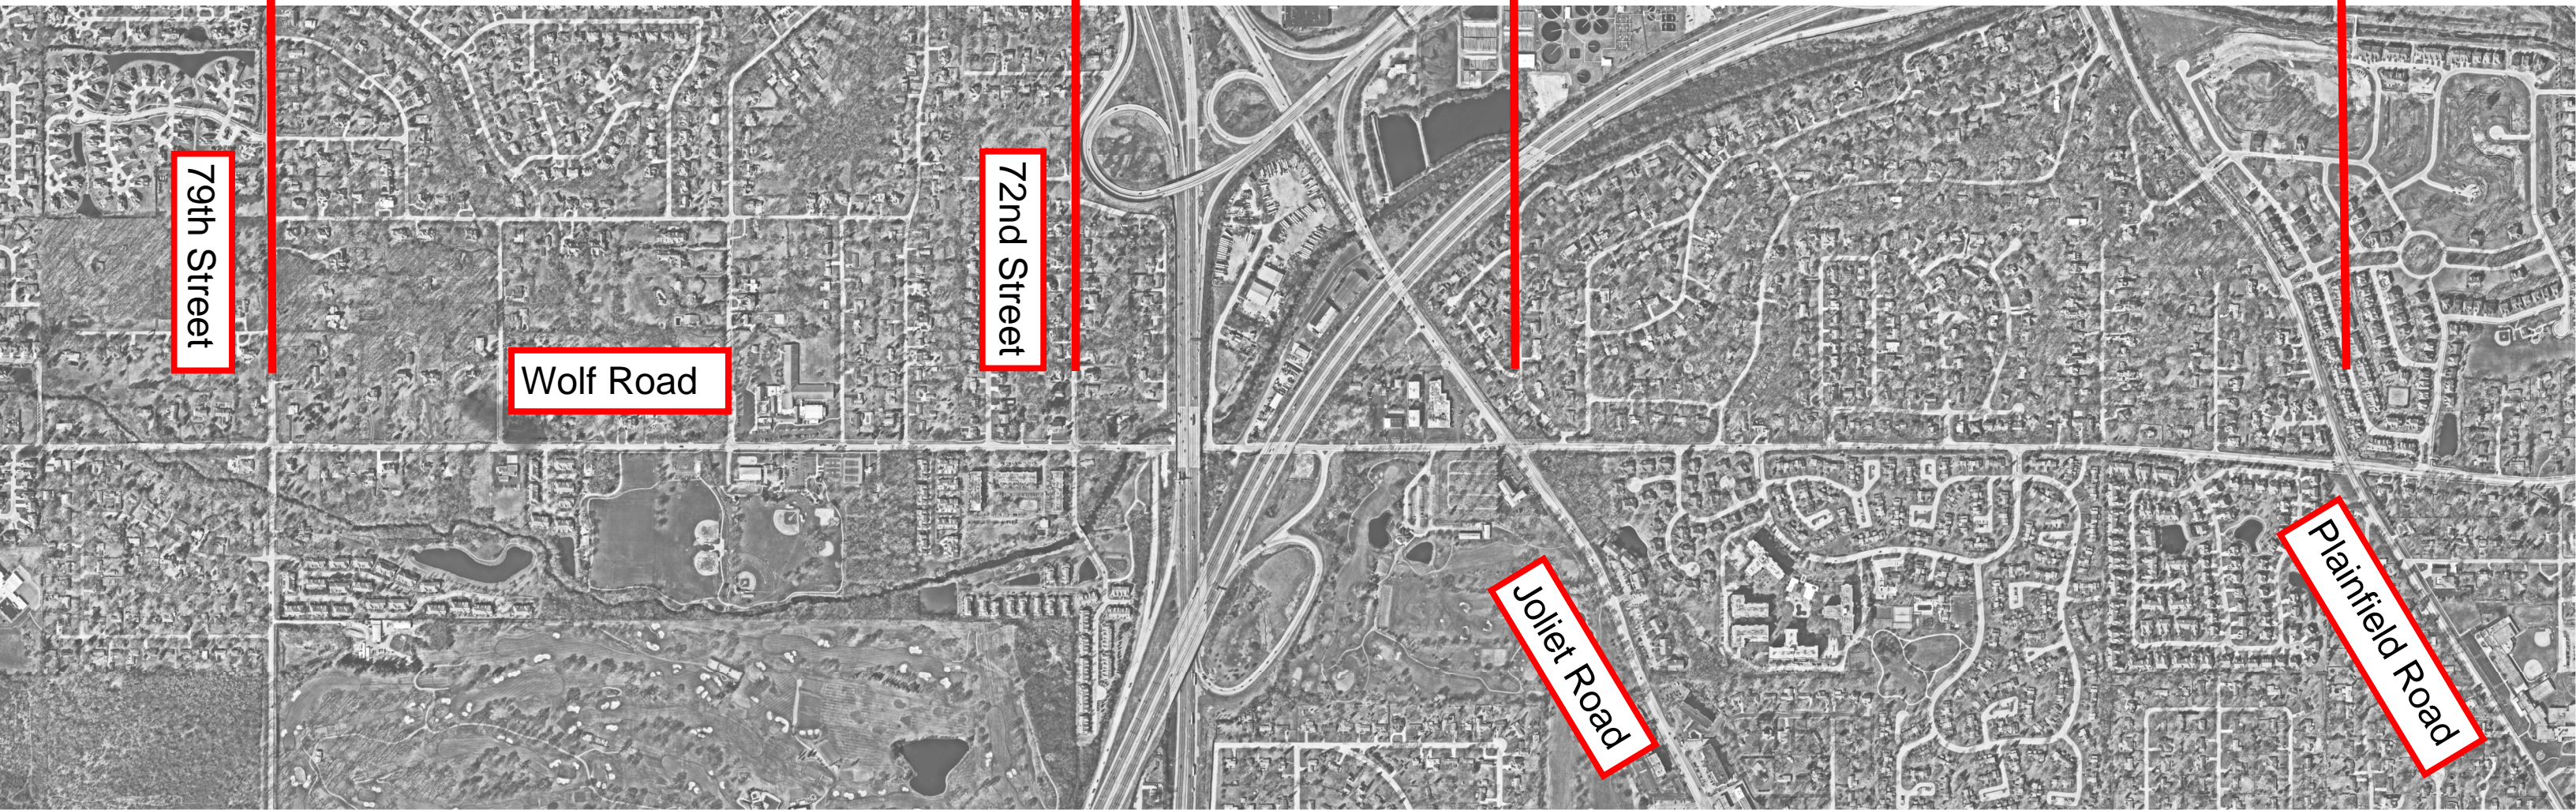

1. We already have a sidewalk from the south entrance of Acacia to the north entrance of Acacia, through Acacia, we connect to the sidewalk which runs along the Ashbrook subdivision. We could have a short sidewalk on the West side of Wolf from Big Bear to the area across from Acacia's north entrance and put a crosswalk there that will cross over to Acacia's sidewalk. We could put a similar sidewalk/crosswalk from Blackhawk trail to the South entrance of Acacia.
2. If we eliminate the right hand turn lanes and the concept of a center turn lane in this corridor, would it be possible to move the road east of its current location by a few feet and then add a sidewalk on the West side of Wolf from Joliet to Plainfield. This might minimize the impact to our tree canopy which is very heavy on the West side, and it gives both those on the East side of Wolf and the West side of Wolf a safe route.

I am mainly concerned with the area from Joliet Rd to Plainfield and with consideration for proper water drainage, I believe there should be pedestrian sidewalks on both the east and west sides of wolf road. These can be standard 48" wide. The buckthorn needs to be removed and landscaping should be better planned along the sides of wolf road. If the timing allows for the power lines to be buried underground, I believe that will help any future planted trees grow properly and it would be advantageous for all. I don't know if ditches or curb and gutter are better for drainage, so defer to experts on that.

If there is room for a bike lane on the road, great, If not, it's not my priority but sidewalks on BOTH sides of wolf road are very necessary for safe passages for our children. With both sides having pedestrian paths, it will eliminate the need to cross in between Joliet and Plainfield. Pedestrians on either side can walk to the corners of Joliet and/or Plainfield and cross at those lights.

OVER

Because of the incline on Joliet Road heading North, few cars travel the posted 35mph, they rev up to around 40/45mph. Most South bound traffic is traveling at least 45/50mph. This excessive speeding along with all of the semi-truck traffic and emergency vehicles (which travel at least 2/3 times daily) make it unsafe for pedestrians and bicycling.

For over a year now, 18-wheel semi's heading North on Wolf turn East onto Acacia Drive to Algonquin. They follow our Algonquin (our residential road) and exit South on Wolf. Last year one stalled over both lanes of Wolf Road. I spoke to the driver who told me his GPS sent him down Algonquin. The last Police Chief was going to try and contact the truckers GPS to straighten this out. Our streets are fairly new and will NOT last with this type of traffic. We are a small subdivision and this is dangerous for the old folks walking dogs and small children.

I live on the corner of Algonquin and Wolf, my patio door faces our complex entrance/exit and I witness the travels in this area at all times of the day and evening.

- There are LITTLE to NO pedestrians walking in either direction.
- Bicycles travel this area about 3 to 4 during the week. Bicycle groups travel usually on Saturday or Sunday mornings and they travel 3 to 4 abreast in the North bound lane as cars try to go around them.

I am NOT opposed to three lanes (middle turning lane) with curbs, but I see NO NEED for pedestrian or bicycle paths to be included.

I live in Acacia & my town house faces Wolf Rd.
Right now I live in a nice cul de sac,
which is buffered from Wolf Rd
by thick shrubbery. If ~~the~~ Wolf Rd
is widened & the shrubbery is taken
away, I will basically be living on a
busy street. This will negatively affect
my property value. Both of my children
walked or biked daily to school, starting
at ages 8 & 11, without supervision. There
was not a need for a sidewalk or bike trail
because they road/walked through Acacia,
to the chip trail, & on to the sidewalk
by Ashbrook. I believe that any bike
path or sidewalk on the East Side
of Wolf, between Joliet & Plainfield
will be a complete waste & will unnecessarily
ruin the quality of life for the Acacia
residencies near Wolf Road.

We desperately need pedestrian and bicycle infrastructure! Sidewalks with separate bike lanes are the way to go through the whole corridor. This will make our community safer and more desirable. The future requires investment in walkable, sustainable communities.

To Whom It May Concern:

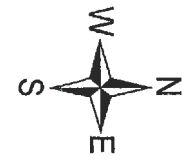

My comments on the Wolf Road plan basically involve safety and encroachment on resident's property. I live at _____ at the corner of Wolf Road and Acacia Drive approximately ½ mile south of Plainfield Road. My second floor office overlooks Wolf Road. I regularly observe traffic on Wolf Road exceeding the 35 mile an hour speed limit by 15-20 miles per hour. I seldom see any traffic enforcement as our police department is very small.

When I envision both foot and bicycle traffic on either side of Wolf Road, I think of a disaster waiting to happen. Twice in the past few years, two cars have careened off of Wolf Road and onto our lot. Our house was only spared by a large row of Buckthorn bushes and a drainage ditch, which stopped both cars. They are natural barriers preventing cars from hitting homes.

Under the new plan, my fear is these barriers will be removed endangering all the homes abutting Wolf Road. What plans do you have for ensuring the safety of residents and their homes? What safety measures do you plan for those walking and riding bicycles along Wolf Road? Also, what plans do you have to replace the trees and bushes along Wolf Road? Environmentally, the destruction of trees and bushes as a result of this plan appears to run contrary to current environmental goals.

Lastly, what do the planners intend to do about possible water encroachment on the properties parallel to Wolf Road? At the present time we have a ditch on the east side of Wolf Road at the back of our property. This drainage ditch prevents water from entering our lot. We would like assurances this ditch will not be removed. If it is, what contingent plans have been developed to prevent flooding on the east side of Wolf Road between Acacia's north and south entrances?

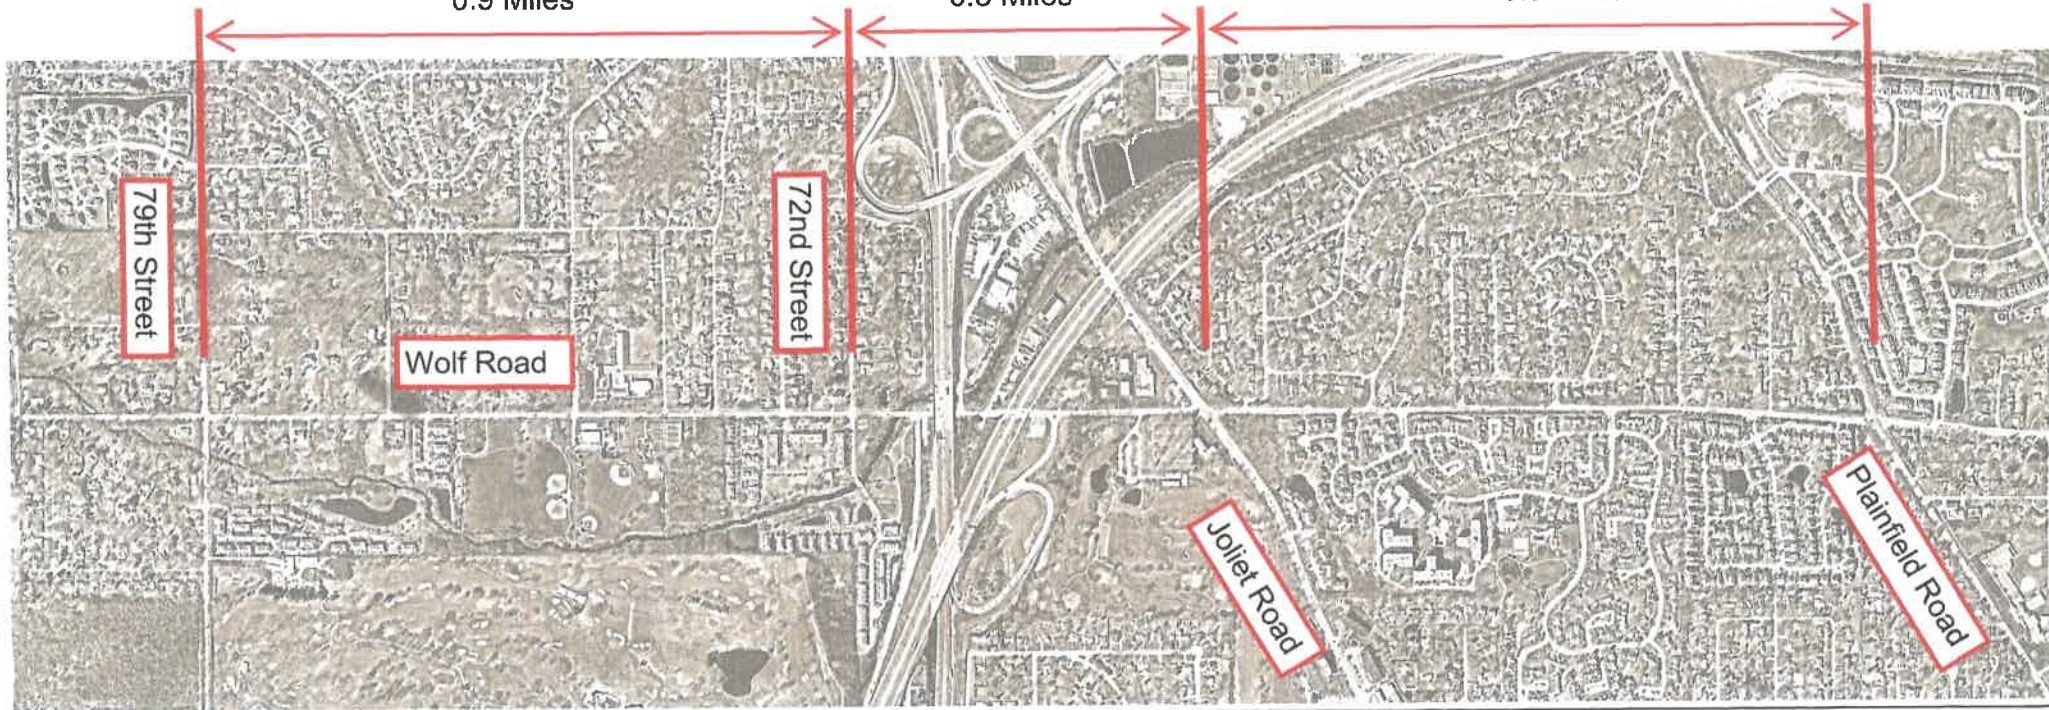

Thank you for an opportunity to comment on the Wolf Road corridor study. Feel free to contact me if you have any questions.

OVER →

1) WOULD TAKE AWAY OUR PROPERTY
WE WOULD LOSE OUR DRIVEWAY & PART OF
YARD.

2) EVEN WITH SO CALLED IMPROVEMENTS,
CROSSING JOLIET RD TOO DANGEROUS!

WHY WOULD YOU ENCOURAGE ANYONE
TO ENDANGER THEIR SAFETY?

3) TREES WOULD BE DESTROYED

4) TRUCK TRAFFIC WOULD INCREASE

5) WE BUILT OUR HOME 52 YEARS AGO.
NEVER DID WE EXPECT THAT WE
MIGHT LOSE OUR HOME TO ROAD
EXPANSION.

IT SADDENS OUR HEARTS!!!

THE EXPANSION SHOULD NOT HAPPEN!!!

JUST LEAVE THE ROAD ALONE. IT
SEEMS NOT NECESSARY TO CAUSE
SO MUCH DAMAGE TO HOMES, & TREES

6) FLOODING WILL ALSO INCREASE.

My opinions:
 79th to 72nd:

- Roadway Section - Either choice is good.
- Two way left Turn: Yes
- Sidewalk: Yes - Both would be nice if there is room. Otherwise either side is fine.
- Shared Use Path: NO - I'd vote for On street bike lane.
- On street bike lane: Yes

72nd to Joliet road:

- Roadway Section - Either choice is good.
- Two way left Turn: Yes
- Sidewalk: Yes - Both would be nice if there is room. Otherwise either side is fine.
- Shared Use Path: NO - I'd vote for On street bike lane.
- On street bike lane: Yes

Joliet to Plainfield:

- Roadway Section - Either choice is good.
- Two way left Turn: Yes
- Sidewalk: Yes - Both would be nice if there is room. Otherwise either side is fine.
- Shared Use Path: NO - I'd vote for On street bike lane.
- On street bike lane: Yes

Please consider requests of residents of IHP.

Closed sewers

No two lane/way left turns

No shared use path

Sidewalk east side only

No on street bike path

Thank you,

Hi

I'm sorry for responding late to this request. I haven't been involved with research or discussions on this project since the previous request for comments.

All three sections: Roadway Section: Closed (Curb and Gutter)

All three sections: Two-Way Left Turn Lane: Yes, at intersections or locations where there are two cross streets.

I'm in favor of a Shared-Use Path because it seems that pedestrian use is not that regular, unless stop signs will be needed at every cross street or driveway for a Shared-Use Path. In that case, On-Street Bicycle Lanes for all three sections could be a better way to handle bike traffic. Sunday mornings are typically busy times for bike use on Wolf Road.

79th Street to 72nd Street: Sidewalk/Shared-Use Path both sides due to school and park

72nd Street to Joliet Road: Sidewalk/Shared Use-Path west side to/from commercial area

Joliet Road to Plainfield Road: Seems that there is not sufficient pedestrian use for Sidewalks in this section but bike traffic should be handled by a Shared-Use Path or On-Street Bicycle Lanes.

I will be out of town from Friday-Sunday but will check my emails or you can text me at _____ if you have questions or need to clarify any answers. I know my sidewalk responses aren't real consistent.

Thank you.

wrote:

Closed sewer & curb for smallest road footprint possible

Maintain character of village with minimal damage to trees and loss of land

Two way turn lanes would be an asset, we currently have them on Wolf Road in front of Ash Brook and Acacia. Really helped with traffic. AS LONG AS SPACE ALLOWS

Sidewalk but no multi-use path

Plan should not negatively impact homeowners by loss of land, or homes.
